Professional Summary

Full-Stack Software Developer with 7 years of coding experience building robust mobile and web solutions, with a focus on financial services, health tech, education, and compliance systems. Successfully delivered mission-critical applications including banking platforms, comprehensive e-learning solutions, e-commerce websites and enterprise GRC systems. Known for writing clean, maintainable code and translating complex business requirements into scalable technical implementations. Passionate about leveraging emerging technologies to improve workflow and create innovative digital experiences that drive business growth.

Skills

- **Languages:** JavaScript, TypeScript, PHP, Kotlin, Python, C, C#
- **Frameworks/Libraries:** React, React Native, Expo, Next.js, Angular, .Net, Laravel, Node.js, Nest.js, Express.js, Django, TailwindCSS, Bootstrap
- **Databases:** MySQL, PostgreSQL, MsSQL, MongoDB, SQLite, Redis
- **Tools & Technologies:** Git, GitHub, Docker, AWS, Firebase, Supabase, Stripe, Paystack, Yoco
- **Others:** WebSockets, WebRTC, Figma, Xcode, Android Studio, Gradle, Postman, CI/CD, Agile methodologies, AI Agents and MCP Servers

Professional Experience

Full-Stack Developer (Mobile & Backend)

Optimus Bank Limited, Lagos

January 2025 - Present

- Leading development of the corporate internet banking mobile app as the project's technical lead.
- Built and integrated an AI chatbot API powering in-app conversational banking on Optiverse.
- Developed Optipass, a visitor management system, handling full backend implementation.
- Integrated with Google ML-Kit to implement facial liveness detection for biometric authorization of high-stakes user actions.
- Shipped multiple mobile features including group savings, scheduled transactions, international payments, and health insurance.
- Refactored core areas of the codebase to improve maintainability and scalability across the stack.

Freelance Full-Stack Developer

2025 – Present

- Built and shipped four client products spanning mobile health tracking, crypto analytics, a full salon booking ecosystem, and a real-time multiplayer game.
- Worked independently across the full stack — from API design and database architecture to mobile and web frontends.

Full-Stack Web Developer

Mitiget Assurance and Technology, Lagos

January 2024 - January 2025

- Developed an e-learning platform (Mitiget Learning Academy), featuring a course registration system, a

- quiz system, an audit system, and affiliate marketing functionality.
- Led the frontend team of a Governance, Risk, and Compliance (GRC) system project.
- Created an events management and registration website using vanilla PHP.

Projects

Professional Projects

- **Optiverse**
A banking application designed for seamless transactions, featuring an intuitive, user-friendly interface for effortless navigation.
Technology: React Native, Typescript, Redux, Redux Thunk, Context API, Tailwind, NativeWind, REST API.
[Live Preview](#)

[Live Preview](#)

Freelance Projects

- **Healthify** — Health tracking mobile app with OCR-powered lab report analysis, daily reminders, weekly check-ins, and Google Health Connect integration for cross-app data sync.
Technology: React Native, NestJS, PostgreSQL, Firebase.
- **Iris Crypto Engine** — Crypto intelligence dashboard featuring live market prices, trading signals, alpha feeds, portfolio tracking, and watchlists.
Technology: React, Supabase.
- **The Gentle Touch** — Full salon ecosystem: customer mobile app, marketing website, and admin portal supporting appointment booking, payments, real-time chat, product shopping, staff management, and service configuration.
Technology: Expo, React Native, Next.js, NestJS, MongoDB, Firebase, Redis, Yoco.

- **Pictionary-style Android TV Game** — Real-time multiplayer game where players draw on a web canvas that streams live to an Android TV; other players guess in real time via WebRTC.

Technology: Kotlin, WebRTC, Cloudflare Workers.

Personal Projects

- **Telehealth (E-Health website)**

September 2024

A web based health services platform. Includes feature to search for hospitals near you.

Technology: Typescript, React, TailwindCSS, MapBox API, Geoapify.

[Live Preview](#) | [GitHub Repository](#)

- **Subssum (Telecoms website)**

August 2024

A telecommunications website.

Technology: React, TailwindCSS, NodeJS, Express, MongoDB, REST API.

[Live Preview](#) | [GitHub Repository \(Frontend\)](#) | [GitHub Repository \(Backend API\)](#)

- **Clinic Website (SPA)**

October 2023 - December 2023

A single-page application for a clinic, featuring diagnostics, prescription and patient information management systems.

Technology: HTML, CSS, JavaScript, Laravel, MySQL, REST API.

[GitHub Repository](#)

- **2-D Platform Game**

August 2022

A browser-based platform game showcasing front-end development and game logic skills.

Technology: HTML, CSS, Javascript.

[Live Preview](#) | [GitHub Repository](#)

- **Secondary School Portal**

December 2021 - April 2022

A comprehensive school management system with student, teacher, and admin interfaces.

Technology: HTML, CSS, JavaScript, PHP, MySQL.
